Wow Wee International RoboSapien — Remote Control Robot

Model: 8081

Releases 04/30/2004

See more [RoboSapien](#)

Step into the future with **RoboSapien — Remote Control Robot**. This easy-to-use humanoid is ready for eons of fun right out of the box; there's no complicated setup or need for a computer. RoboSapien's 60-plus commands are easily controlled by an ergonomic remote, not some impossible-to-understand algorithms or formulas.

Sit back and watch as this 14" personal robot goes through movements and activities you never thought possible in a home robot, from its hilarious kung-fu motions and "caveman" voicing, to shaking hands and picking up objects around the house. Plus, the RoboSapien doesn't get around rolling on hidden wheels to approximate walking. It actually walks, and runs for that matter!

More Options
